3 4
2 5
1 6

2H 8H
4H

AERATRON

WiFi Retrofit: The installed receiver and remote control must be replaced with the new receiver & remote as pictured above. Follow STEP 4 & 5 in the user manual to disconnect and remove the installed receiver.

1. Remove sticker on the receiver and connect the WiFi module to receiver.
2. Install receiver into the hanger bracket (STEP 4) and connect the receiver (STEP 5) in the user manual.
3. **WiFi setup:** Download the latest **tuya** **SMART app** and follow the instruction:

ADD Device - - ▶ Small Home Appliances - - ▶ Fan (WiFi) - - ▶ 2.4Ghz - - ▶ WiFi name/ Password - - ▶ Switch on the main power to activate the receiver - - ▶ Set the fan speed to Speed 1 (slowest) on the remote - - ▶ press and hold the ⬤ button for 5 sec. till receiver beeps and after 3 sec. it will beep again to confirm successful setup.

For General Information & Warranty issues refer to the Aeratron™ User Manual available at **www.aeratron.io**

Thank you. Your Aeratron team.
